DETAILED ACTION

1. This is a **FINAL OFFICE ACTION** in response to communications received on 06/17/2009. Claim 1 has been cancelled and claim 2 has been newly added. Claim 2 is addressed below as the only claim pending in the application.

Response to Amendment

2. The applicant's ADS submission fails to clarify the priority issue since the ADS submission is improper for lacking the proper "Supplemental ADS" identifier, and further for not properly identifying the change to the information with strikethrough.. Furthermore, the applicant has cancelled claim 1, which renders the previously set forth 35 USC 101 rejections to the claims moot.

Specification

3. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Specifically, there is no antecedent basis in the specification for the claimed term "storyboard".

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 2 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. In order for a claimed process to be considered statutory it must be: (1) tied to a particular machine or apparatus, or (2) transform a particular article into a different state or thing. The use of a specific machine

or transformation of an article must impose meaningful limits on the claim's scope to impart patent-eligibility; the involvement of the machine or transformation in the claimed process must not merely be insignificant extra-solution activity; and the transformation must be central to the purpose of the claimed process. In the instant case there is no tie to a particular machine or apparatus, or transformation of a particular article from one thing or state to another. The claimed method recites the use of a "storyboard", "tickets" and "buckets" however, none of these components constitutes a machine within the context of the requirements for statutory subject matter shown above. Each of these elements are merely objects or printed matter used within the performance of the method. None of these elements carry out any of the steps of the method. As there is no critical tie to a machine recited in the pending claims, the claims are directed to nonstatutory subject matter.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
